PROFILE

Detail-oriented and highly skilled Quality Assurance (QA) professional with experience in test automation, manual testing, and software quality processes. Proficient in building and managing Docker images, automating test execution with Squish, and integrating CI/CD workflows using Bitbucket and Azure DevOps. Strong expertise in test documentation, reporting, and process improvement using Confluence and test management tools. Adept at collaborating with developers to identify and resolve issues, ensuring high-quality software delivery. Skilled in scripting, API testing, performance testing, and bug tracking, with a keen eye for detail and a problem-solving mindset. Passionate about optimizing QA workflows to enhance efficiency and product reliability.

WORK EXPERIENCE

Nexus Ag | München

QA Engineer 2024 - Present

- Designing and executing over 600 automated test cases using Squish and Selenium.
- Building and managing Docker images for software deployment.
- Developing and Maintaining CI/CD pipelines for automation and Manual Testing Using Jenkins and Git.
- Pulling and committing code changes to Bitbucket following automated testing with Squish.
- Document and identifying over 100 bugs using Jira, improving the overall defect resolution of product.
- Generating detailed reports and documenting findings in Confluence.
- Maintaining comprehensive documentation of test processes and workflows in Azure DevOps.
- API testing execution using Postman and Test Scripting using Squish and Katalon Studio.
- Executing functional, regression and system testing on web.
- Collaborating closely with developers to resolve issues related to test failures.

Münchner Tafel e.V | München

- Write and maintain SOQL statements to retrieve data from Salesforce.
